(54) **BOTTLE RACK FOR REFRIGERATOR**

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a bottle shelf for a refrigerator in which a plurality of wine bottles of different diameter or length can be laid freely and stably.

SOLUTION: The bottle shelf 12a comprises a first rack section 13 for laying a plurality of bottles of same size in parallel in same direction, and a second rack section 14 for laying a plurality of other type of bottles of different size at 180° in the direction opposite to that of the bottles in the first rack section 13 wherein the positions for laying bottles are overlapped between the racks 13, 14 and a bottle of corresponding size is laid at any one position. The positions for laying bottles can be shifted, as required, in the racks 13, 14 and the width can be adjusted depending on the diameter of the bottle.
